PROFILE

Hands-on WordPress developer with 15+ years managing and improving websites for businesses and marketing agencies. I own small web projects end to end: from site setup, themes and plugins, through layout and styling changes, landing pages and content updates, to speed, mobile usability, analytics and SEO. I'm as comfortable swapping an image or fixing a broken link as I am tracking down a plugin conflict or a DNS problem, and I work independently without needing every task spelled out.
